Streamlined processes for organizing events, which reduced planning time by 30% and increased event attendance by 15%.

Projects

Adblocker for LinkedIn

- *Engineered a Chrome extension using JavaScript that detects and filters promoted LinkedIn posts.*
- *Enhanced user browsing by reducing ad visibility by 95% with minimal performance impact.*

Expense Tracker

- *Designed a Python-based expense tracker with visual analytics, leveraging libraries like tkinter and matplotlib.*
- *Provide users with bar and pie chart insights into spending patterns.*
- *Integrated Firebase for secure data storage.*

Concept Website - Machine Learning

- *Developed a website using HTML, CSS and JavaScript to illustrate the concepts of K-Nearest Neighbors, Naive Bayes Classifier and Decision Trees.*
- *Users can Play around the concepts by practicing the concepts on the website itself by using the given dataset.*

Entrepreneurship Development Program

- *Developed a Flask-based web platform with PostgreSQL backend to connect entrepreneurs with mentors.*
- *Enhanced user engagement through real-time analysis for the user, higlighting the areas they need to improve on.*
