I'm a passionate developer with a background in web development and developing Neural Networks. I love to learn and indulge myself on things that pique my curiosity.

EDUCATION

Amrita Vishwa Vidyapeetham, Coimbatore 2026

Bachelor of Technology, Computer Science and Engineering, 7.46
Relevant Coursework:: Data Structures and Algorithms, Object-Oriented Design, Database Systems, Software Engineering, Machine Learning, Deep Learning.

PROJECTS

Expense Tracker

Description

- Developed a full-stack desktop application using Python and Tkinter for the user interface, integrating Google Firebase for real-time, cloud-based storage of expense data.
- Implemented data visualization features with Matplotlib to generate dynamic bar and pie charts, offering users clear and actionable insights into their spending patterns.

VADER Sentiment Analysis

Description

- Engineered a sentiment analysis tool in Python to classify user-input text as positive, negative, or neutral.
- Engineered a sentiment analysis tool in Python to classify user-input text as positive, negative, or neutral.

Sticky Notes App

Description

- Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React, Node.js) to provide users with a seamless digital note-taking experience.
- Designed a RESTful API to handle CRUD (Create, Read, Update, Delete) operations, ensuring persistent data storage and real-time synchronization of notes across user sessions.

Fake News and Deepfake Detection

Description

- Built a dual-purpose detection tool using Python and TensorFlow to identify misinformation in both text and video formats.
- Implemented a Convolutional Neural Network (CNN) for fake news text classification and a Visual Transformer (ViT) model to detect sophisticated video manipulations and deepfakes.

EXTRACURRICULAR

Tredence AI Hackathon March 2025

- Reached the final round of the Hackathon.
- Built an application that could detect Fake News and Deepfakes.

Developer, iDEA Club **June 2023 – December 2024**

- Collaborated with a team to develop real-world projects that translate theoretical computer science concepts into practical applications.
- Contributed to initiatives that directly enhanced the technical skills and conceptual understanding of club members.
- Played a key role in boosting club engagement and participation by 15% through the successful launch of impactful projects.

Core Team Member, iDEA Club **April 2025 - Present**

- Lead cross-functional project teams, guiding them from ideation through to successful completion to meet strategic club goals.
- Oversee project timelines and workflows, ensuring all planned objectives are delivered efficiently and on schedule.
- Mentor junior members and foster a collaborative environment to drive technical excellence and innovation within the club.

Head of Event Management, Amrita Model United Nations Society **November 2023 - September 2024**

- Directed the end-to-end planning, logistics, and execution of five large-scale mock Model United Nations (MUN) events.
- Implemented strategic outreach and engagement initiatives that successfully increased event participation by 20%.
- Developed and led training programs that prepared members for competitive, real-world MUN conferences, enhancing team performance.

Joint Secretary, Amrita Model United Nations Society **September 2024 - Present**

- Serve as the primary liaison between faculty advisors and the core committee, ensuring seamless communication and timely issue resolution.
- Streamlined and re-engineered event management processes, achieving a 30% reduction in overall planning time.
- Drove a 15% increase in event attendance by optimizing organizational workflows and enhancing communication strategies.

SKILLS & CERTIFICATIONS

Programming languages: Python, Java

Computer Software: Jira, Slack, Docker, Git, PostgreSQL, MongoDB, FireBase

Core Concepts: Data Structures, Object-Oriented Programming, Machine Learning

Development Libraries and Frameworks: MERN, PERN, Meta-Learning (Auto-ML), Few-shot learning (Auto-ML) , Tensorflow, Pytorch, JavaScript [React, Next, Node, Express]

Certification: Microsoft Azure AI Fundamentals (AI-900, Credential ID: 921C84CF54FCFA0, Certificate Number: DFBY93-16E309)
